Premier Technical Services Group Ltd (PTSG) is contracted to deliver specialist Access & Safety equipment at a site in Sunderland where a £450m car battery gigafactory is being built.

Envision AESC is creating a 50-acre International Advanced Manufacturing Park which will form part of a £1bn partnership with Nissan UK and Sunderland City Council to create an electric vehicle hub to deliver the next generation of electric vehicle production.

This commitment will power Nissan's new vehicles in the first phase and support the continued localisation of vehicle parts and components with advanced technology.

The gigafactory represents an initial 9GWh plant with potential future-phase investment by Envision AESC of £1.8bn. This will generate up to 25GWh and create 4,500 new high-value green jobs in the region by 2030, with potential on site for up to 35GWh. This commitment will power Nissan's new vehicles in the first phase and support the continued localisation of vehicle parts and components with advanced technology.

PTSG Access & Safety Ltd has been on site since December 2022 to supply and install a bespoke fixed guardrail solution to the perimeter of this substantial new building.

PTSG is trusted by over 20,000 customers to deliver products and services that protect people, property and places, ensuring they remain safe and compliant with the latest regulations.

For PTSG, access and safety encompass all types of equipment that allows engineers to safely access all areas of every kind of building to carry out specialist services – from the testing and certification of roof anchor points to the design and installation of the world's largest building maintenance units.

The Group's training is well-known and respected throughout the industry and can be tailored to a particular industry or working method.

The Group's training is well-known and respected throughout the industry and can be tailored to a particular industry or working method and will provide the essential skills and knowledge needed to manage work at height operatives, operate a safe system of work or to effect a safe and swift evacuation or rescue. PTSG can assist you in choosing the right safety training solution for your requirements and environment and provide ongoing re-certification and work at height support.
